

A ONE-STOP-SHOP FOR **SUSTAINABLY SOURCED** TROPICAL HARDWOODS

All you need for outdoor construction

Brazilian Lumber is...

Premium decking,
built the right way.

Brazilian Lumber is a place where you can find everything you need for your buildings. The brand specializes in manufacturing and importing sustainably sourced tropical hardwoods and outdoor decking materials.

Reasons to prefer us

1

We are a one-stop-shop

We offer customers a place to purchase a wide variety of tropical hardwoods, composite decking, maintenance products, decking accessories, and artificial turf to create exceptional living spaces.

2

Sustainability is our priority

We believe that sustainability and responsible forestry management are key to conservation. That's why we are insistent on offering FSC-certified wood, and all wood has a chain of custody.

3

Our wood is the BEST in the world

When you buy our Brazilian tropical hardwoods, you are getting:

- High quality
- Strong natural properties
- Long-lasting material
- Sustainable resource

CONSERVING THE RAINFOREST IS EVERYONE'S MISSION

Did you know that rainforest resources can be used through sustainable resource management?

This technique keeps the forest standing, and ensures conservation of the environment and biodiversity, as well as contributing to carbon sequestration. It also reduces the impact of the greenhouse effects.

But, what does sustainable management mean?

Before selecting the trees, an inventory of flora and fauna is made. A forester designates the trees that can be harvested according to their maturity and respecting their natural cycle. The entire process is monitored by satellite, which makes it possible to collect data on the history of each tree.

“

**OUR WOOD,
OUR PEOPLE,
& OUR CUSTOMERS,
ARE THE KEY PIECES
OF OUR COMPANY ”**

As a company, preserving the environment is our core value, so we sincerely believe that following a sustainable procedure is the right thing to do.

Nevertheless, environmental protection is everyone's responsibility. When you choose products that come from sustainable forest management, you contribute to the forest's survival and conservation.

PLATINUM WOODS

A Superior Quality of Hardwoods has arrived

After years of perfecting the art of hardwood manufacturing, we have developed our own platinum hardwood collection, incorporating an extra level in the grading process. **We offer only the highest quality tropical hardwoods**, preferred by architects and designers for luxury homes and exquisite exteriors.

We are proud to present our
Fine finished woods

Ipe Platinum: One of the best woods in the world

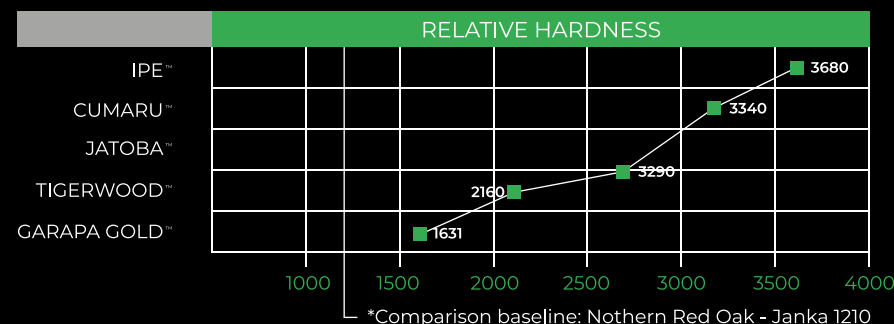

Cumaru Platinum: A luxurious and durable wood

Garapa Platinum: A perfect choice for exterior projects

Tigerwood Platinum: The golden lumber you were waiting for

Jatoba Platinum: Widely used for exterior carpentry

*Comparison baseline: Northern Red Oak - Janka 1210

IPE PLATINUM®

Extremely warm and elegant, also known as Brazilian Walnut. It has an appealing color that ranges from olive-brown to reddish. Its beauty and durability are the most important reasons why it is rapidly becoming the ultimate luxury wood.

Another great feature is that IPE will not splinter or crack, making it suitable for high-traffic areas. In addition, Ipe has a high fire rating, which makes it comparable to that of concrete and steel.

IPE PLATINUM comes exclusively from sustainably managed forests according to principles of sustainable development. IPE PLATINUM is carefully selected after going through several quality inspections. Then it's branded with our unique **PLATINUM WOODS** symbol.

Scientific name:

Handroanthus spp

Color: Olive-brown to reddish

Janka Hardness: 3,510

CUMARU PLATINUM®

CUMARU is also known as Brazilian teak. Similar to Ipe, it has a high fire rating (Class A) and resists mold, termites, and decay. It is used for exteriors but can also be used for solid hardwood floors that are beautiful and high foot traffic resistant. What differentiates Cumaru from the rest is its unique and exquisite coloring.

Scientific name:
Dipteryx odorata
Color: Medium to dark-brown
with a reddish hue
Janka Hardness: 3,330

CUMARU
PLATINUM®

GARAPA PLATINUM®

GARAPA, or Brazilian Oak, distinguished by its golden tone, is a tropical hardwood widely used in any outdoor woodworking project. Its hardness and high resistance to extreme weather conditions, mold, termites, decay, and water make it suitable for patios and lawn decking. The most important advantages of using Garapa are that it is easy to work with and has the same beauty as more expensive hardwoods.

Scientific name:
Apuleia leiocarpa
Color: Honey blonde to
golden-brown
Janka Hardness: 1,630

JATOBA PLATINUM®

JATOBA, also known as Brazilian cherry, is a luxurious and exotic wood characterized by its dramatic color. The tones of the wood range from dark orange to deep brown with a saffron hue. It is traditionally used for interiors and exteriors due to its high foot traffic resistance.

Scientific name:

Hymenaea courbaril

Color: Light orangish brown to a darker reddish brown, sometimes with contrasting darker greyish brown streaks.

Janka Hardness: 2,690

Brazilian Lumber® | Platinum Woods

JATOBA
PLATINUM®

TIGERWOOD PLATINUM®

TIGERWOOD has a unique appearance due to its particular color combination of golden-brown hues that contrast with dark brown streaks. In addition, it is one of the most durable woods. Tigerwood is sustainably harvested and can be used for indoor and outdoor projects.

Scientific name:
Astronium Fraxinifolium
Color: Reddish-brown with
dark brown stripes
Janka Hardness: 1,850

THERMALLY MODIFIED WOOD

**PLATINUM
WOODS®**

Thermally modified wood goes through a process in which the chemical properties of wood are modified with heat and steam removing moisture from the wood's cell, increasing its durability and stability to obtain a high quality product for indoors or outdoors applications.

COMPOSITE DECKING

This is **the fastest-growing alternative to wood decking on the market.** Its major advantage is that it has a core and a cover that makes it resistant to moisture, weathering, and fading.

Brazilian Lumber is an authorized distributor of many types and brands of composite decking, including three-sided and four-sided decking. Both products share the same quality, sustainability, and good service standards.

PVC DECKING

PVC decking boards are made of synthetic materials only, without any wood shavings or wood by-products. Its boards are made of recycled polyethylene or polyvinyl chloride.

Contractors often prefer this material when installed next to the ocean because **it is more resistant to corrosion, fading, and general degeneration than traditional wood.**

This brand's products use polymers to withstand the tests of time and weather. Choose from Azek's diverse collection to add stylish details to a variety of exterior applications.

Simpson is THE solution

For more than 50 years, Simpson Strong-Tie has focused on creating structural products that help people build safer and stronger homes and buildings.

Considered a leader in structural systems research, testing, and innovation, Simpson Strong-Tie is one of the world's largest suppliers of structural building products.

**EB-TY® Premium Hidden
Deck Fasteners™**

VIKING HARDWARE

This is the most advanced rain screen system on the market

The Viking Clip hidden fastener installs wood siding permanently and beautifully on commercial and residential projects.

Did you know that the rain screen siding system dates back to the 12th Century?

Norwegians and Japanese built the first known rain screens, which have withstood time tests.

The Viking Clip System provides lasting strength and beauty to the rain screen design. It is also the most affordable of the many concealed fasteners available on the market.

Viking Clip Fasteners

Deckwise has the **BEST** accessories for your outdoor construction projects

This company has manufactured high quality Made in the USA hidden deck fasteners for exotic hardwoods and composite deck building since 2000.

With a proven track record of extraordinary customer satisfaction, these deck-building products are comprised of high-grade, long-lasting materials.

All Trex® deck collections are compatible with this hidden installation option, giving you a clean finish no matter your design style.

**Trex Hideaway®
Universal Hidden Fasteners Box**

OIL DECKING

Apply oil to the wood
to preserve its color

Our oils are formulated to penetrate the surface texture of the wood. This means that the product protects the wood decking from the inside. The high concentration of oil and wax makes the boards very resistant to water and dirt penetration while providing a very durable and easy-to-care surface.

An important fact is that a suitable oil must contain UV protection. The oil brands we offer meet this recommendation.

The ally to give a perfect finish to hardwoods

We have developed the **BEST Hardwood Oil Finish**. Suitable for sidings, rails, and decks. It is a semi-transparent brown liquid that has an architectural grade formula badge.

Semi Transparent Brown Liquid

Alternatives that also stand out from the crowd

This product is specially formulated for exterior wood and provides a penetrating protective finish to your hardwood. It can be used on siding, railings, and decking, maintaining the wood's natural color and preventing graying or fading.
